Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of the invention of Group I, claims 1-16, in the reply filed on December 16, 2004 is acknowledged.

Specification

2. The disclosure is objected to because of the following informalities: on page 3, line 18, --they-- should be inserted after "sometimes".

Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With regards to claim 1, the recitation "said support platform is slidably positioned **upon** said support shafts" is not clear. It is the examiner's understanding that the support shafts extend **through** the support platform, which platform is slidable along the support shafts. It is also not clear if "a first member and a second member" recited in lines 10-11 of claim 1 and in claims 8, 9 and 13 are the same "first member and a second member" recited in line 6 of claim 1.

Art Unit: 3726

In claim 4, the term "straight pattern" is not vague since "pattern" could be a form or model proposed for imitation or a natural or chance configuration as defined by Merriam Webster's Collegiate Dictionary.

Allowable Subject Matter

5. Claims 1-16 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

6. The following is a statement of reasons for the indication of allowable subject matter: the prior art does not teach a frame joiner press system comprising a support platform having a platform slot wherein the support platform slides along support shafts extending upwardly from a base, with one retaining structure connected to the base below the platform slot for retaining one or more V-nails, these in combination with the rest of the limitations in the claim. It should be noted that Dunn (US Patent 5,605,270), one of the closest prior arts, discloses a support platform 33 slidable on support shafts 32, however in the Dunn reference, the fasteners are retained in member 83 above support platform 33.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
